And Technology Program

Theme Area: Facilities and Infrastructure

Program Area: Hydroelectric Infrastructure Protection

Project No.: FI00.18

Project Title: Turning Gear for Hydroelectric Generator Rotor

Principal Investigator: Philip Atwater, e-mail: patwater@do.usbr.gov

Co-Principal Investigators: Roger Cline

Abstract: The project will develop a design procedure for a turning gear for hydroelectric generator rotors. The procedure will allow any hydroelectric facility to design a working turning gear for safe rotation of their generators.
